

PVAPins.com Delivery Policy

Upon receipt of your order, PVAPins.com will deliver the requested services in accordance with the specific terms applicable to the purchased service.

The nature of the service ordered and the time of purchase may affect the timing of service delivery. Typically, delivery of a temporary phone number for SMS verification occurs within seconds.

However, there may be times when availability is limited due to external factors such as operator constraints or country-specific number supply. During such periods, the range of available services may be reduced.

If you encounter unavailability or delays, please contact our support team for assistance or information on when the service will resume availability.

Up-to-date information regarding the availability of phone numbers and services is displayed continuously on the PVAPins.com dashboard and is updated regularly around the clock.
